

### SMALL 50 CAVI-JET PUMP

Intended to the work with **CAVI-JET DEVICES**, which are used for small-scaled jobs, such as cleaning of yachts, pleasure boats, wharfs and other objects with not big surfaces

Pressure.....160 bar  
 Power.....50 kW  
 Weight.....430 kg

### MEDIUM 110 CAVI-JET PUMP

Work with **CAVI-JET EQUIPMENT**, aimed at cleaning jobs with not big volumes: offshore objects and waterworks, average ships, middle and big yachts and so on

Pressure.....230 bar  
 Power.....110 kW  
 Weight.....1200 kg

### MEDIUM 160 CAVI-JET PUMP

Water supply of **CAVI-JET SETS**, oriented at qualitative execution of middle scaled jobs: cleaning of ships of different displacement, big and middle yachts, offshore and waterworks objects and others

Pressure.....250 bar  
 Power.....160 kW  
 Weight.....1900 kg

### BIG 220 CAVI-JET PUMP

Targeted at **CAVI-JET SYSTEMS** used both for underwater and above-water cleaning goals. Highly efficient cleaning of big and medium ships, offshore objects of oil & gas extraction and other cleaning jobs for all the marine and river objects

Pressure.....300 bar  
 Power.....220 kW  
 Weight.....2700 kg

### MOBILE CAVI-JET COMPLEXES

- Cleaning of sea and river vessels of different classes - tankers, dry cargo ships, container ships, bulkers, passenger and naval vessels, dedicated ships, pleasure boats and yachts
- Cleaning of offshore and floating oil and gas platforms, their equipment and support frames, field mines and exploration drill stations, SPM and other offshore objects

- Cleaning of oil loading terminals, mooring facilities, transport and gas deepwater pipelines
- Cleaning of stationary waterworks - piers, moorings, molls, bridges and other objects of sea and river water area
